FOR THE DIGITAL PHOTOGRAPHER

PRODUCT CATALOG

KAPTURE VIEW 35

The **KAPTURE VIEW 35** is designed to attach the Canon EOS 1Ds or Kodak DCS Pro 14n to the rear standard on any Sinar P or Horseman view camera. This adapter enables view camera movements and stitching in both landscape or portrait orientations. This creates nearly double the file size and field of view. The 1Ds and Pro 14n may be rotated in place without removing the camera from the adapter. The Sinar P focus plane is maintained at all times. A center detent for single image capture is also provided. Catalog # KG-KV - **\$2495.00**

FUJI GX 680 STITCHING ADAPTER

The Kapture Group Fuji GX 680 **STITCHING ADAPTER** enables the stitching of 2 images in landscape or portrait orientation. This creates nearly double the file size and field of view. This adapter also rotates 90 degrees allowing for vertical and horizontal stitching providing tremendous flexibility. A center detent for single image capture is also provided. Imagers that benefit from this adapter are 2 x 3, 4 x 4 and 5 x 4.

Catalog # KG-FS - **\$1995.00**

Please note: A Fuji GX 680 OneShot or Proshot is also required for all PhaseOne, Leaf Valeo and Kodak DCS Pro Back Plus digital backs. See inside cover for details.

The Kapture Group **SLIDING BACK ADAPTER** allows digital backs to be mounted to any view camera for perspective control. Rotatable inserts allow for portrait or landscape orientation of your digital back. The Kapture Group Sliding Back adapter incorporates a bright Beattie Intenscreen Plus focus screen. Masking for 2 x 3, 4 x 4 and 5 x 4 chips provides both horizontal and vertical orientation for image composition. Catalog # KG-007 - **\$1795.00**

The Kapture Group "**STRETCH**" Sliding Back Adapter for Leaf Volare, Cantare, CantareXY allows both live video as well as ground glass focusing capabilities. Rotatable inserts allow portrait or landscape orientation when other backs are used. The Kapture Group "STRETCH" Sliding Back incorporates a bright Beattie Intenscreen Plus focus screen. Masking for 2 x 3, 4 x 4 and 5 x 4 chips provides both horizontal and vertical orientation for image composition. Catalog # KG-007STR - **\$1995.00**

The **STITCHING BACK ADAPTER** allows digital backs to be mounted to any view camera for perspective control. Rotatable inserts allow for portrait or landscape orientation of your digital back for single image capture or 2 position stitching for increased file size and wider field of view. All Kapture Group Sliding Back adapter incorporate a bright Beattie Intenscreen Plus focus screen. Masking with 2 x 3 and 4 x 4 provides both horizontal and vertical chip orientation for preview. Catalog # KG-007STI - **\$2195.00**

Viewfinder and lens not included

The **TRUEWIDE DIGITAL SLIDING BACK CAMERA** supports 35mm lenses ranging from ultra wide-angle and macro to telephoto. Lens mounts are available for Nikon, Canon FD, Leica R, Olympus, Contax, Pentax K and Minolta. The included interface plate is available in Hasselblad, Mamiya 645AFD and Contax 645 mount. All 3 mounting options are designed to attach your digital back in the portrait or landscape position. A quick release system allows 90 degree rotation without having to detach your back from the drop-in insert. The TrueWide incorporates an Copal #3 shutter for superior results, low vibration and proven reliability. The TrueWide accepts all Hasselblad viewfinders. Masking for 2 x 3, 4 x 4 and 5 x 4 chips provide horizontal and vertical masking for image composition. Simplicity in design and function make the TrueWide an ideal studio and location camera. The TrueWide incorporates 2 horizontal and 2 vertical levels. A bright Beattie Intenscreen Plus focusing screen slides into place for focusing and depth of field preview and then your digital back slides into place for image capture. Catalog # KG-006 - **\$2995.00**

Shift lenses allow full coverage of the new 5 x 4 chips.

The **ONESHOT CABLE RELEASE** for view camera and medium format applications eliminates the need to wake-up the Phase One H5, H10, H20 and H25. Without the OneShot you need to fire your shutter once and then recock the shutter a second time and fire again to capture an image. The OneShot for the Leaf Valeo 6 and C-Most allows the use of all shutter speeds and syncs up to 1/500 second using view camera shutters. The ONESHOT Cable Release for the Imacon Ixpress allows the use of the Hasselblad 200 and 2000 series camera bodies. The ProShot Cable Release allows the Kodak Pro Back Plus to be used on manual Hasselblad camera bodies, view cameras and the TrueWide Sliding Back camera.

Catalog # PBP-001 / PHA-001 / LF-001 / IM-001 - **\$395.00**

The **ONESHOT CABLE RELEASE** for the **Sinar DB Auto Aperture Shutter** allows one shot image capture with all Phase One digital backs. The DB Auto Aperture OneShot is required for use with the Kodak Pro Back Plus and the Leaf Valeo 6 / C-Most digital backs.

Catalog # LF-001DB / PHA-001DB / PBP-001DB **\$595.00**

The **ONESHOT** Release System for use with the **SINAR EXPOLUX** and **EXPOLUX XT SHUTTER SYSTEM**.

This system is specific to PhaseOne digital Backs.

Catalog # PHA-001XT - **\$595.00**

The **FUJI GX 680 SOLUTION**

is designed for use with all PhaseOne digital backs, the Kodak Pro Back Plus, all Leaf Valeo and C-Most digital backs. It is compatible with the Fuji GX 680 model I-II & III camera bodies. The Fuji GX 680 Solution is comprised

of 2 component, the replacement rotating adapter plate for Hasselblad or Mamiya 645 AFD digital backs and a Fuji specific OneShot Release System. Drop-in masks are provided for 2 x 3, 4 x 4 and the new 5 x 4 chip framing. The Fuji GX 680 OneShot is designed to release the Fuji shutter in sync with your digital back. The rotating adapter plate allows rotation between portrait to landscape orientation. All 3 versions of the Fuji OneShot are keyboard enabled and can be triggered from the computer or from the control module located near the camera. A 10 foot extension cable is supplied for remote operation.

Catalog # LF-004 / PHA-004 / PBP-004 **\$1390.00**

The **BRONICA ETRS AND SQAI ADAPTER PLATES** are available in Hasselblad mount for many digital backs including PhaseOne, Kodak DCS Pro Back Plus, Leaf Valeo 6,11 & 22, Imacon Ixpress and many others. The SQAI version is show to the left. A OneShot Cable Release or ProShot Cable Release may also be required depending on the back in use. Flash sync is maintained at all shutter speeds.
Catalog # KG-ETR / KG-SQA - **\$895.00**

Kapture Group offers **REPLACEMENT IR FILTERS** for digital backs requiring external IR filters. A replacement IR Filter for the Kodak Pro Back Plus is also available for view camera tilt and shift applications.
